

**** Important Announcement ****
**Launch of 2 New Pilot
Programmes for 2011**

Following a very good response from the participants consultation questionnaire in 2009, UK NEQAS LI are pleased to announce the launch of two new pilot programmes:

NPM1 and FLT-3

These two assays attracted the most interest from participants as being tests for which they would like an EQA programme. Each programme will be issued twice per year. Samples will be stable lyophilised cell samples.

Please note: There will be a nominal introductory fee to cover costs for the first year. This cost will be revised upwards annually, such that in 5 years (or before that time if the programmes achieve accreditation), the programme will operate at full cost commensurate with other programmes run by UK NEQAS LI.
